DON'T JUST
DREAM IT,
BUILD IT.

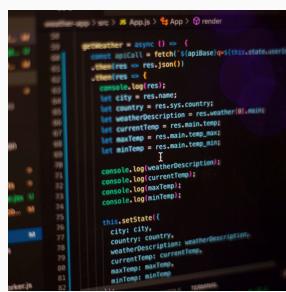

About me

I'm Joverich Lelis, a 21-year-old student from Calamba City, Laguna, who's passionate about technology, creativity, and personal growth. Ever since I discovered the world of programming and design, I've been fascinated by how imagination and logic come together to create something meaningful. For me, technology isn't just a tool it's a way to express ideas, solve problems, and build something that can inspire others.

I love exploring new things whether it's coding a system, designing visuals, or learning new digital tools. Each project I work on teaches me something valuable about persistence and creativity. My biggest goal is to become a professional software developer and use my skills to bring innovation into people's lives. I believe that through technology, we can make a real difference and turn even the simplest ideas into reality.

Outside of coding, I enjoy photography, editing, and discovering creative ways to share stories through visuals. I find inspiration in everyday experiences and in people who are driven by passion and purpose.

ACHIEVEMENTS

Created a Cinema Ticketing System in C++

Designed and coded a full cinema system using data structures like stack, queue, and linked list, showing creativity and logic in programming.

Completed Several Programming Projects

Built small applications in Java and Python as part of personal learning and class activities, developing strong coding and problem-solving skills.

Recognized for Creativity in Digital Design

Produced unique and visually appealing layouts using tools like Canva and Pixellab for school activities and personal projects.

Consistent Academic Performer

Maintained good academic standing and demonstrated dedication, discipline, and consistent effort throughout the semester.

Active Contributor in School & Design Projects

Participated in collaborative class projects that involved coding, layout design, and creative presentation, showing teamwork and leadership potential.

MY INTEREST

I am deeply passionate about technology and the endless possibilities it brings to our lives. I enjoy programming, experimenting with new languages, building projects, and solving challenges—coding feels like a creative playground for me.

I am also an avid gamer, always exploring new games and experiences that challenge my skills and let me unwind while having fun. Gaming keeps me connected to trends in tech and inspires me to think strategically and creatively.

Beyond tech, I am fascinated by business and entrepreneurship. I enjoy learning how innovative ideas become successful ventures and how technology can improve lives and create value for others.

When I'm not coding or gaming, you'll likely find me brainstorming my next project, discovering new apps and tools, or thinking of ways to combine my passions for tech, gaming, and business into something meaningful.
